

# THE RUBY CHALICE VISITATIONS

Vol 2 ♦ The Maha Chohan ♦ Chelsea, Vermont ♦ 2001

*Welcome to the Noonday Sun and your Awakening  
To the Reality of your own Indwelling Light !*

**T**he Maha Chohan, have come to give you an expanded awareness of the circumstances of the children of earth regarding their acceptance of Our Light and Our Assistance. All appeal to us for our help, but so few actually take advantage of most of what we have to offer.

I AM speaking of the Opportunity to gain greater understanding of their lives through the Wisdom and Love of the Ascended Masters and through our Expanded Consciousness. For you see, beloved, far too many turn their backs on us at the appointed hour when our assistance would be most valuable, and consequently lose the Opportunity to receive from our Presence the very keys which they have labored and struggled to attain for many embodiments.

From Our vantage point, we observe repeated cycles wherein aspirants approaching their own dawning awakening to Our Reality will experience opposition of an impersonal nature which prevents them from either understanding the right course of action before them or discerning the God Vibration as it is delivered to them by their own God Presence and their attending angels.

Why do these cycles of vain repetitions continue to occur? It is due to a lack of Illumination in their outer consciousness does not afford these lifestreams the ability to look beyond the encasement of old habits, old traditions, old doctrine, and old dogmas. Such spiritual blindness keeps that one, that very

precious one, from understanding their right course of action, and prevents the expansion of their consciousness into a whole new level of vibration and acceptance of Our Wisdom.

Vibration is a word that you hear so very often in connection with the Ascended Master Teachings because all Life is vibration. All Life emits a rhythmic Tone that resounds upon the surrounding matter planes. That Tone carries with it the intent, and consciousness of the one emitting it. Tone likewise has the ability to elevate or lower the range of perception of the consciousness that produces it.

When one ascends via an accelerated Tone into a new level and plane of God Consciousness, all manner of new spiritual gifts become available to that one. There they may partake of these gifts and use them to expand the Flames of their own Heart. They may allow their Heart Flames to engulf every thought, feeling, and action that are a part of their own lives.

Such accelerated vibrations, enveloping their thought and feeling worlds, will then begin to outpicture the resonating sounds of the Tone of the Heart. When one truly emits the Keynote of their Heart Flame through all their good works, all their thoughts, all their feelings, then that one begins to bring forth into their surroundings all of the beauty and joy which is the true Nature of their own indwelling God Presence.

Sadly, most students do not continue to forge through to that very point of perfecting the Tone. Rather, they tire of striving, or even worse, mistakenly think they have arrived at the highest vibration and settle for less. In so doing, the subsequent lowering of their overall vibration begins a spiral that becomes increasingly difficult to detect or arrest the longer it is indulged. Mankind at large stumbles through life, experiencing either painful or pleasurable consequences to their behavior. They then react just as blindly to the resulting stimulus.

In stark contrast, the *true student* of the Ascended Masters should know only to forge ahead in an intense pursuit of the highest God Vibration. The *true student* should recognize that their Protection lies in the single-minded pursuit of the vibratory action of Our Light, holding fast to the vision and goal of their own Ascension at all costs. The *true student* will not allow any distrac-

tion whatsoever to interfere with the pursuit of anything worthy of achievement held in their mind's eye and ratified by the vibration of the Heart.

As you continue to expand the Threefold Flame and forge your way to the Heart of your own God Presence, you will discover that the radiance sent forth from the Heart will envelop and strengthen all the combination of outer world conditions of your life. These are the circumstances of Life that are destined to provide you Opportunity for self-mastery and to assist in your acceleration to the Heart of your own God Presence.

This, beloved, *is* The Path. Each generation is faced with its own fresh set of circumstances with which to weigh the vibration of Life. No one student is separate or apart from his or her brothers and sisters on the Path. Communion on the part of each Heart Flame allows for the strengthening and the elevation of the consciousness and vibration of all. Without this blending of Hearts, you would not have the opportunity for the consciousness of all to be raised, or for a greater understanding and release of Our Teaching to be furnished to all. This collective elevation of consciousness is how a Golden Age is fostered.

Yet, there are certain cycles that require that each individual must partake of the Gifts and Graces of the Light of God for themselves. No one is exempt. All must make their own effort. This is where the Individualization of your own God Presence will provide for each one of you to move, to expand, and to accelerate into the Light at your own pace. Never lose sight of the fact that your Presence, while it does indeed live as an Individualization of the One God, is never separated from the Allness of the Godhead.

When humanity determines and elects to affirm the All Embracing Oneness of the Light of God present in everyone, and when they will allow for the indwelling Christhood of each one to come into fruition, then you will see the Golden Age. The more each one fosters Unity of the Heart in all aspects of Life, the more the Dawning Golden Age will appear.

All this hinges on a sustained elevation of attunement and vibration by the students. Any discord at any level of consciousness — whether emotionally, mentally, or physically — will only lower

their overall vibration. Conversely, when the Heart is pure and the vision held high on the Light of God, the student would emit the *Tone* that accelerates and ascends, carrying all with it to the heights of the Ascension Flame.

You are charged with the responsibility to Protect and guard well this Opportunity, for you are not only protecting your own acceleration in the Light, but that of all of humanity on the earth.

I have elected to speak to you on these matters at this time because of the importance of the coming Freedom Conclave, and of the Ascended Masters scheduled to address the students. Each of you must understand your role and your individual opportunity to assist the Brotherhood. Oh dear ones, the cycles are shortened for the elect and the elect are those who act in accordance with the Divine Plan of their God Presence. It is our desire that all of you be a part of this Brotherhood of the Elect.

Be sealed in the Comfort Flame of My Heart. Allow for the Peace, the Harmony, the Strength of knowing, and the Courage of your convictions for God Mastery to bring you to this Altar of the Ascended Masters this July for The Freedom Conclave.

Godspeed you to your Victory!

*The Maha Chohan*
